

Ferguson Unit Assessment

The riots in Ferguson MO were caused by social and economic issues. Social because it was all over the media such as twitter and news reports (etc...), lots of people would see and would get fired up and start to riot. Economic because the population is 63% African American and 33% white, (in Ferguson) The arrests percentage is 92% African American and 7% white.

Social might have caused the riots in Ferguson MO because the case was being over-exposed, on the news, twitter and facebook. (etc...) People use these medias regularly, when they see these they have opinions about it and want it to be heard or they want answers. Economic might have caused it because of the Arrest of Ferguson off of races. 92% for African American and 7% white. This could have caused their riots because people, especially African Americans might feel as if they are always ~~se~~ viewed ~~in~~ in a bad way.

In conclusion, the riots in Ferguson MO were caused by social and economic →

issues. Social because it was being overexposed and people were becoming aware of it and wanted to give their opinions too. Economic because of arrest percentage. While African American percentage is way higher than white. They are mostly viewed as bad people just like Michael Brown. Some people viewed him as bad after he supposedly surrendered according to eye witnesses.
